### BEAUTIFUL NATURAL COLOR LILY CHART

Many brand new Hybrid Lilies are pictured in life-size natural color.

Several very special varieties not offered on page 15 of this book are described and offered. A postcard or request with your order will bring it to you without obligation.

## YOU'LL WANT TO KNOW

Cultural instructions included with all orders. Please do not ask us to ship C.O.D. It involves extra expense for you, additional red-tape for you and for us and frequently causes delay.

**TIME OF DELIVERY:** Seeds are snipped immediately upon receipt of your order. Bulbs ordered before they are ready for shipment will be mailed as quickly as possible after the bulbs reach us from our Holland growers. All bulbs, with just a few exceptions, are ready for delivery after the middle of September and all hardy varieties can be planted outdoors any time from then until the ground freezes hard.

**PARK'S GUARANTEE**—We guarantee our seeds and bulbs to the full extent of the purchase price to be true to name and sure to grow under favorable conditions. We will always do more than fair dealing demands to give you satisfaction. Because weather conditions and other things over which we have no control sometimes cause crop failures, it is agreed that in no case shall the Geo. W. Park Seed Co. be liable for more than the original purchase price. In case plants are damaged in transit, we must be notified within 10 days.

## DEAR FRIENDS,

Wouldn't it be fun to see every variety and species of bulb described in this book in full bloom? Then if you could also see the most promising new varieties from Holland's best growers ranged beside them, wouldn't you feel that you could choose the best kinds in all the world for your garden?

You're cordially invited to visit us during the Spring blooming season, and you'll see just such a display. Small blocks of each variety we offer, and new varieties still in the testing stage, possibly for introduction next year, all lined up for your inspection and pleasure.

This type of trial, with the cost of the bulbs, growing them and the days spent in evaluating them is expensive, but it qualifies us to recommend with authority the varieties which "pass the grade" and are included in our catalog listing. We feel that this is an invaluable service to you. It insures that the bulbs you get from Park, are the best varieties, as well as the best bulbs available in the great Floral Kingdom.

We'll look forward to hearing from you. It will be a pleasure to serve you, especially since reports from our growers indicate that we'll have extra fine bulbs for you. You'll like our service too, and perhaps even appreciate this gentle reminder, if because of it, you plant these lovelies in your garden. For, they'll burst forth into glorious color thrilling you to your toes and bringing the good springtime with them too.

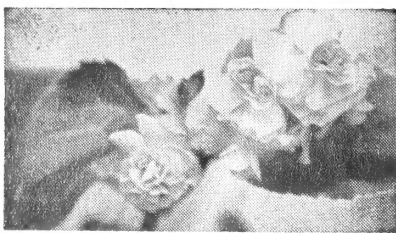

I took a day to search for God  
And found Him not. But as I trod  
By rocky ledge, through woods untamed,  
Just where one scarlet lily flamed,  
I saw His footprint in the sod. (B. Carma)

Huge flowers are produced on long erect stems. The color range is superb. There is a tendency toward the handsome deeper tones of red and blue, but it is well balanced with lighter yellows, whites, light blues. 60 seeds 25c; 300 seeds \$1.00; 1/32 oz. # GIANT PANSIES

## A PARK SPECIALTY

Pansies are well and favorably known, so that a description of their exquisite beauty, and usefulness in the garden is unnecessary. They are simply indispensable, and if we were to name a half dozen of our best selling flowers, the Pansy would be one of them. There is, however, much difference in the strains, some being greatly superior in vigor and free-blooming quality to other plants as well as the great size, form, variety, and richness of colors and variations. We are pleased to say that the seeds we offer are from Pansy specialists, all of the new crop, and cannot be surpassed in quality, regardless of claim or price.

# PARK'S PERENNIAL FLOWER SEEDS

## for Permanence and Charm

These are valuable subjects of the flower garden, as most of them are not only showy and beautiful when in bloom, but will do service year after year for a long period, enduring cold, excessive rain and drought, regardless of neglect and improper attention.

Directions for making outdoor beds and sowing seeds are sent with every order.

**Hp. HARDY PERENNIALS** are hardy plants which will live and bloom every year for a long period. Plants grow to the flowering stage each year and die down again to the roots which remain alive but dormant until the next season. They are very valuable for borders and cut flowers, and once established require less care than the annuals.

**Hb—HARDY BIENNIALS** are those which bloom the second year from seed, then die. For a continuous display of this type, seed must be sown every year.

# ANNUALS for FALL SOWING — Nature's Way

Fall Sown, these produce Sturdier Plants, Earlier Bloom, Longer Stems.

The purpose in fall planting is not to germinate the seed in Autumn, but to get the seed in place, ready to grow with the first favorable weather of spring. Plant slightly deeper than in spring. Protect the sides of beds with boards to prevent washing seeds away. Apply a protective mulch as soon as the ground freezes. Ideal planting time is just before the ground freezes.

From Philadelphia southward—Larkspur may be sown in September so that the seeds may germinate in the fall. With a protective mulch after the ground freezes, they will live over winter, and give extra early long stemmed flowers. From Washington D.C. southward, Sweetpeas too can be handled this way. From Southern Virginia southward add to these Antirrhinum, Dianthus, Phlox, Poppy, Calendula.
